

## **OUR STAFF**

**Bassett's most valuable skill offered is our exceedingly trained and experienced staff. Bassett is an open shop contractor, who takes great satisfaction in training our staff to be the safest they can be as well as team players. We take pride in being active field contractor by performing much of the work with our own labor force. We typically perform concrete work, carpentry work, miscellaneous steel, millwork, doors and frames and building specialties on each project. By Bassett being field active it assures control over costs, scheduling and most importantly quality.**
